350-046-A00	Locknut	1
375-039-A00	Cap	1

Instructions/Notes

- Release pressure within the valve.
- Set valve to minimum adjustment.
- Remove original wire stop ring (where applicable) and locknut.
- With face seal in groove, thread locknut onto adjust screw until it bottoms out on hex body.
- Torque locknut to 108 lbf in. (12 Nm) while keeping adjustment secure.
- Adjust valve to desired setting and install wire stop ring (where applicable).
- Install cap onto locknut, ensuring second locknut seal is in groove below thread. Tighten to 108 lbf in. (12 Nm).
