

Control kit

Model:
991-026

Sun's Protective Cap is constructed of flexible polyethylene plastic which press-fits onto the L-Control cartridge shoulder creating a snug, vacuum seal. Since this cap is both removable and replaceable, protection from corroding elements is provided along with the ability to make field adjustments to the cartridge's setting. This cap is available from Sun as a kit containing ten pieces.

Technical Features

- Sun's counterbalance cartridges have shorter adjustment mechanisms and can, therefore, accommodate lower profile covers.
- Constructed of a flexible polyethylene plastic which, when installed correctly, creates a vacuum seal around the cartridge's adjustment mechanism.
- For use on all Series 1 Counterbalance Cartridges with an L adjustment.
- Kit contains (10) reusable pieces.
- The protective cap is designed to be both removeable and reuseable to allow for setting adjustments in the field.
- Can be conveniently installed and removed by hand.
- For additional protection, the interior of the protective cap around the sealing lip area may be coated with lithium grease (NLGI Grade 2).
