

Tamper resistant cover, cartridge control kit

Model:
991-033

Sun's tamper resistant cover is a zinc plated steel cover which press-fits onto the L Control cartridge shoulder. Valves may be ordered in this configuration from Sun by specifying a C control in the model number. The pressure setting must be specified at the time of the order and the setting will be stamped on the cartridge hex. Sun kits for replacement parts or field conversion are available.

Technical Features

- For use on all Sun cartridges with an L control.
- Sun's counterbalance cartridges have shorter adjustment mechanisms and can, therefore, accommodate lower profile covers.
- The tamper resistant cover is designed to be a non-removable item. Once removed, it can not be re-assembled to the cartridge.
- The new plastic (black) covers will only fit those cartridges designed to accept them. Metal covers will fit all cartridges within the applicable series the cover was designed for.
